DETAILED ACTION

In response to the restriction requirement set forth in the Office Action mailed April 18, 2008, Applicant has elected Group I, Claims 1-3 and 5-8 for continued examination without traverse.

Reasons for Allowance

- 1. Claims 4, 9 and 10 are canceled.
- 2. Claims 1-3 and 5-8 are allowed.
- 3. This is examiner's statement of reasons for allowance.

Regarding claims 1-3 and 5-7, the prior art, either singularly or in combination, does not each or suggest an image reading apparatus comprising:

a first light source having first and second light transmission areas that extend along an axial direction and face each other;

a conveyance unit that conveys an original document sheet such that it faces the first light transmission area; and

a reading unit that receives light emitted toward the original document and reflected therefrom and reads an image of the original document sheet;

a second light source that is disposed at a distance from the original document sheet; and a moving unit that moves the second light source along the original document sheet when the conveyance unit has come to a stop, such that the light emitted from the second light source while it is moving and reflected by the original document sheet is received by the reading unit, wherein the light that is emitted through the first light transmission area and reflected by the original document sheet passes through the first and second light transmission areas and is led to the reading unit.

Regarding claim 8, the prior art, either singularly or in combination, does not each or suggest an image reading apparatus comprising:

a first light source having first and second light transmission areas that extend along an axial direction and face each other;

a conveyance unit that conveys an original document sheet such that it faces the first light transmission area; and

a reading unit that receives light emitted toward the original document and reflected therefrom and reads an image of the original document sheet;

wherein the light that is emitted through the first light transmission area and reflected by the original document sheet passes through the first and second light transmission areas and is led to the reading unit; and

wherein the first light source has a pole configuration with a polygonal cross-section.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
